

**CESAM-RD-C**

**Public Notice Number SAM-2006-0424-JBM (MOD.2)**

The applicant has applied for certification from the State of Mississippi in accordance with Section 401(a)(1) of the Clean Water Act, and upon completion of the required advertising, a determination relative to certification will be made.

Also, the applicant has applied for certification from the State that the proposed activity complies with and will be conducted in a manner that is consistent with the State Coastal Zone Management Program. A determination relative to consistency will be made by the Mississippi Department of Marine Resources.

This public notice is being distributed to all known interested persons in order to assist in developing facts on which a decision by the U.S. Army Corps of Engineers (Corps) can be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition. The decision whether to issue a permit will be based on an evaluation of the probable impact, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources.

The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered, including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food production, and in general, the needs and welfare of the people.

The Corps is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state with

**CESAM-RD-C**  
**Public Notice Number SAM-2006-0424-JBM**

particularity, the reasons for holding a public hearing.

Evaluation of the probable impacts involving deposits of dredged or fill material into waters of the United States will include the application of guidelines established by the Administrator of the U.S. Environmental Protection Agency.

In accordance with Section 106 of the National Historic Preservation Act, and Appendix C of 33 CFR 325, the undertaking defined in this notice is being considered for the potential to effect cultural and historic properties within the permit area. Although the extent of federal control and responsibility for these considerations are confined to the limits of the permit area for this particular project, the potential indirect effects that may occur to historic properties as a result of this undertaking are also being considered. We are seeking comment from the State Historic Preservation Officer, federally-recognized American Indian tribes, local historical societies, museums, universities, the National Park Service, and concerned citizens regarding the existence or the potential for existence of significant cultural and historic properties within the permit area. Historic architectural or archaeological investigations may be necessary to ascertain the existence of such resources. Efforts will be made through the consultation process to avoid, minimize, or mitigate any adverse effects to significant cultural and historic properties that may occur as a result of this undertaking. The district engineer remains the final decision authority.

Preliminary review of this application and the U.S. Department of the Interior List of Endangered and Threatened Wildlife and Plants indicate that the proposed activity will not affect listed endangered or threatened species.

MOBILE DISTRICT  
U.S. Army Corps of Engineer

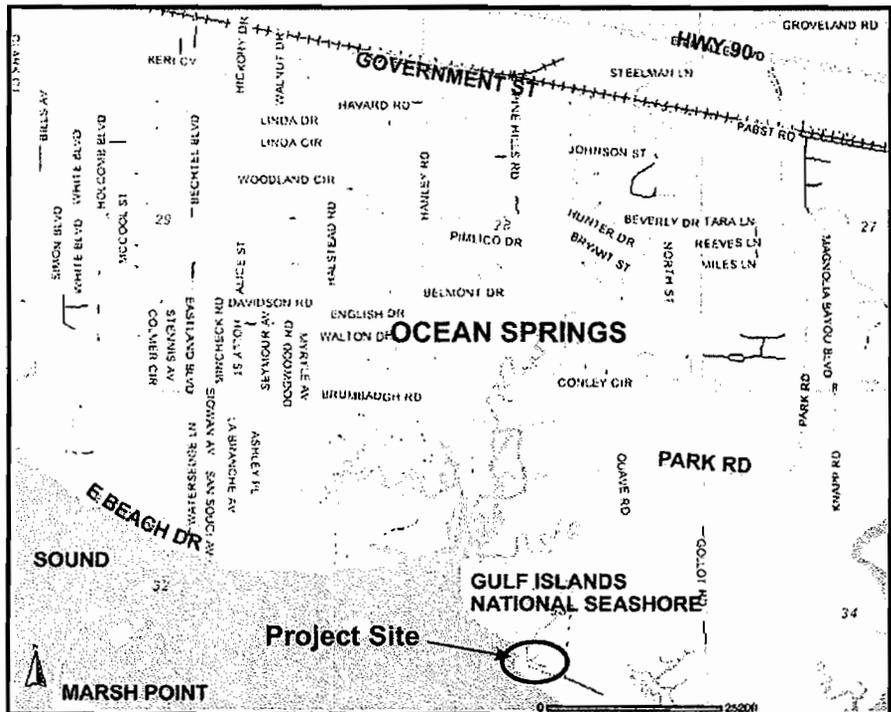

**SAM-2006-0424-JBM**  
**Modification # 2**  
**Applicant's Proposal**

The Jackson County Board of Supervisors requests an amendment to the Davis Bayou, Phase I dredging permit. Eagle's Nest Bayou, located at the southeastern most end of Davis Bayou, was heavily silted by the storm surge during Hurricane Katrina, and the accumulated sediment should be removed so that boating access can be restored. Dredging is currently in progress in Davis Bayou, so the Supervisors respectfully request that approval for this additional dredging be granted in as speedily as the process permits.

This amendment to the Davis Bayou permit requests authorization to dredge about 1,800' of the Eagle's Nest Bayou channel, beginning at the Davis Bayou channel, about 300' south west of the Eagle's Nest inlet, and then proceeding eastward to the end of the south arm of the bayou. The two north branches of the bayou will not be dredged. The dredged channel will be about 30' wide and will be dredged to a depth of -4' MLW, with a 3:1 side slope finished profile. Dredging will remain at least 10' away from shorelines with the goal being to leave shoreline vegetation undisturbed. About 2,500 CY of dredge material will be removed by crane and barge and will be deposited in the already approved Toche Shipyard disposal site.
