

13 February 1973

## MEMO TO FILES

SUBJECT: Inspection of Beaches on Dauphin Island (Mobile County Shoreline Erosion)

1. Early in January I received a telephone call from Mr. Eugene Holt, Maintenance Supervisor for the Marine Environmental Sciences Consortium on Dauphin Island, concerning erosion of the Gulf shoreline of their property, the former radar station reservation adjacent to Fort Gaines. On 12 February, I drove to Dauphin Island to inspect the eroding beach.
2. I met Dr. George Crozier, Director of the Consortium, and Dr. Barry Vittor, his assistant, at their administration building and we drove down to a point near the beach. Several of the old groins put in to protect Fort Gaines have been bypassed and are now well out in the water. Dr. Vittor had the beach surveyed recently and noted that last week's storm had cut the beach back to the point where some of their baseline stakes were missing. They will continue to survey this reach at intervals and keep us posted on their results.
3. We went back to the main office and picked up Mr. Holt. On Mr. Holt's office wall there is a reservation map prepared by the Brookley AFB engineering office dated 23 March 1960. This map shows the shoreline about 200 feet Gulfward from 2 beach houses. Their foundations are now in the water and Mr. Holt said that Hurricane Camille had finished them off. I estimate that the shoreline has receded about 300 feet since the survey for this site map.
4. Leaving the Consortium, I drove west along the island and stopped to inspect the beach at a number of sites. The Dauphin Surf Club Condominium has been constructed at the south end of Johnson Street by Anderson Development Ltd. I noted their warning signs in the dunes for a considerable distance either side of the Surf Club entrance. The entire condominium has been built in front of the dunes. However, there is a very broad, flat beach fronting their development with no direct evidence of erosion.
5. I stopped at the Isle Dauphine Club, the Casino Fishing Pier, and at the west end of the residential area. At none of these points was there obvious erosion.

6. Mr. Holt, at the Consortium, and Mr. Joe Henderson, Manager at the Dauphin Island Casino Pier (Mail at that address on Dauphin Island, Alabama 36528, Phone 861-4672) have agreed to take wave observations.

WALTER W. BURDIN  
Civil Engineer
