<b>QC NARRATIVES</b> <b>ACTIVITIES IN PROGRESS</b> Dredge Columbia dredging from station Sta 1120+00 to 1180+00. Dredged 3 load and disposed 3 loads.  <b>GENERAL COMMENTS</b> Normal Dredging operations. Turtle Excluder Device installed and Hopper inflow screen in place. Endangered Species Observers on board.  Follow-up phase mode. All dredge and disposing activities are in accordance with plans and specifications. Had small hole/crack on hopper combing when resuming dredging on load 148. Temporary plug immediately with a follow up repair on transit back to cut. Minimal spillage. Will review load data.  Strong southerly winds the previous night into the early morning hours. Down for weather delays until seas subsided offshore later that afternoon.  Chief working on dump valve sensors, replace and stiffen supports. Continue head way on progress with less false sensor readings during dredging operations.

<b>QC NARRATIVES</b>			
<b>ACTIVITIES IN PROGRESS</b>			
Dredge Columbia dredging from station Sta 940+00 to 1000+00 Dredged 4 load and disposed 4 loads.			
<b>GENERAL COMMENTS</b>			
Misplaced dump of load #331 when valve #3 & #4 opened, lost hydraulic pressure to ram., while in route to disposal. Minimal impact as material was spread as six of the eight valves still closed. Believe control panel issue when drag tender closed hydraulic valves to lock pressure to dump valve rams after dredging load. Dump valve ram #3 and \$4 slowly lost pressure and eventually opened on transit to disposal site. Technician and new panel control replacement scheduled for Wednesday when Columbia is at dock for fuel.			
Load #331 time 0% due to non performance of contract specs. 137 minutes.			
Normal Dredging operations. Turtle Excluder Device installed and Hopper inflow screen in place. Endangered Species Observers on board. Turtle Observer change on dredge Columbia			
Follow-up phase mode. All dredge and disposing activities are in accordance with plans and specifications.
