BID EVALUATION

(1) It is the intent of the Government to secure a dredge, meeting the requirement set forth in the Statement of Work of the specifications. The Table in the paragraph entitled DREDGE AND ATTENDANT PLANT REQUIREMENTS indicates the estimated average output for dredges of various power based on average theoretical conditions under which this work is to be accomplished. Bids will be evaluated and award will be made on the basis of employment of the plant; which will result in the lowest overall total price, as described hereinafter, to the Government for the equipment. For the purpose of bidding and evaluating bids, it will be considered the dredge will work for the estimated amount of hours in the Table. This is not to be construed by the Contractor that the Government guarantees this number of hours will be worked.

(2) Bidders should insert the appropriate number of hours obtained from the Table into the bid schedule item 2.

(3) The number of days for Bid item #4 for the dredge bid is obtained by taking the "97% efficiency Hours" (Attachment #1) and multiply by 5% and divide by 24 hours and round to the nearest whole number. Example using the Newport: $(3708 \times .05) / 24 = 7.7$ insert 8 days in bid item #4. Maximum amount for this bid item is \$5,000.00 per day.

(4) Bids based on dredges smaller or larger than those listed in the Table will be considered non-responsive. Other dredges are considered inadequate for satisfactory performance of work required within the period of the contract.

(5) The Government will check the bidder's computation for accuracy and to insure that the bidder's computation was made in accordance with the above evaluation procedures. In case of variation between the bidder's computation procedures and those prescribed above, the Government will correct the bidder's computation and the bid will be evaluated by the corrected computation.
