

Silver Star News 2/17/05

**The Former Memphis Depot
Community Information Session**

**Thursday, February 24, 2005
6 p.m.**

**South Memphis Senior Citizens Center
1620 Marjorie Street
Memphis, Tennessee**

Dr. Ralph Ludwig, a senior scientist with the U.S. Environmental Protection Agency's Office of Research and Development Ground Water and Ecosystems Restoration Division, will describe Zero-Valent Iron (ZVI) technology, which is being used as a cleanup remedy for groundwater beneath Dunn Field. The Depot's environmental contractors will also be present to answer questions about use of ZVI at Dunn Field.
