

THE MEMPHIS DEPOT TENNESSEE

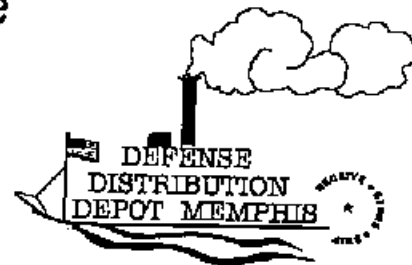

ADMINISTRATIVE RECORD COVER SHEET

AR File Number 139

Defense Distribution Depot Memphis, Tennessee News Release

2163 Airways Blvd.
Memphis Tennessee
(901) 775-6753

January 2, 1996

Memphis, TN--Defense Distribution Depot Memphis, Tennessee (DDMT) will be installing groundwater monitoring wells on the Depot and in the surrounding area of the Depot beginning the week of January 8, 1996. These wells will help determine groundwater conditions on and around the Depot and will also be used to help establish boundaries of possible groundwater contamination that may have occurred because of past burial practices at the facility. The testing will be completed by the end of February.

These wells will be placed in a small area of ground within the city's right-of-way near the street. The wells, which are mounted flush with the ground, will be covered and locked. This testing should cause little or no inconvenience to the community.

For additional details contact Ms. Chris Kartman, DDMT Environmental Officer, at 775-4568.
