January 22, 1996

Mr. Mark Corey  
CH2M Hill  
P.O. Box 2305448  
Montgomery AL  
36123-0548

Dear Mark,

Please fax me the data on the sediment samples. I didn't find them in the DDMT Background Study Summary sheets. There is a map and bar charts, but no individual numbers similar to the surface water and soil samples. Thanks, for your attention to this matter.

I think we did the best job we could in the January RAB meeting considering the potential severe winter conditions present that night. I feel very strongly that we need to spend the next RAB meeting going over the figures. Specifically, the figures detected in the field and their relevance to the conditions found inside the Depot's fence line. I look forward to a more in depth discussion of this at the next RAB meeting. I am particularly interested in the location of the new soil test sites within the Depot itself.

Also, is it possible to get color maps of the bar chart maps handed out at the January 18th meeting? The black and white bars really don't tell you that much.

Sincerely,

  
Larry J. Smith
