RE: Letter and Summary Table, Dunn Field Groundwater Quality Data  
TDEC/DSF #79-736, cc 82

Dear Mr. Kaden:

The Tennessee Division of Superfund (TDSF) Memphis Field Office (MFO), on behalf of the Tennessee Department of Environment and Conservation, reviewed the above-referenced document received in this office on March 7, 1997.

Although comments on this document are not required, the Division has the following observations.

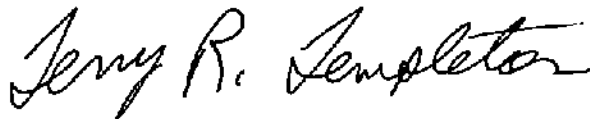

1. Data in the Summary Table appears to be extracted and reformatted from data presented in Table 3-6 of the CH2MHill report called "Groundwater Characterization Technical Memorandum" (currently under review by this office).
2. The cover letter from CH2MHill states that the data is "for wells within the capture zone of the groundwater recovery system currently being designed...." Wells for which data are reported were marked on the Groundwater Monitoring Well Location map. Were data for the following wells, which appear to be in or near the proposed capture zone, intentionally left out?

MW-34, MW-36, MW- 40, MW-41, MW-42, MW-43 & MW-44

3. The heading for the table indicates that the analytical data presented are from "recovery wells." The monitoring wells for which data are listed are not recovery wells. Recovery wells have yet to be drilled.

Should you have any questions about these comments please don't hesitate to call me at (901) 368-7957.

Very truly yours,

Terry R. Templeton, P.G.  
Project Manager  
TDEC/DSF-MFO
