Mr. Jordan English
Tennessee Department of Environment and Conservation
Division of Superfund
2510 Mt. Moriah, E-645
Memphis, TN 38115-1520

Dear Mr. English:

The Defense Distribution Depot Memphis, Tennessee is pleased to forward to you a copy of the Waterways Experiment Station Draft Groundwater Modeling Report for the Dunn Field groundwater interim remedial action. This copy of the report is a facsimile version. We will forward to you a hard copy version of this report that will include the graphs and charts in a color format later this week. Please use this copy for your review until you receive the hard copy.

To aid you in your review, we have also enclosed a copy of color slides that were used in a recent meeting with personnel of the City of Memphis Stiles Wastewater Treatment Plant. Hopefully, these color slides will help you interpret the drawings from the Groundwater Modeling Report until you receive a better version of the report.

Please provide comments to this document, along with the comments on the Fifty Percent Design for the Groundwater Interim Remedial Action and the Groundwater Characterization Technical Memorandum no later than Friday, April 18, 1997. Please contact Mr. Shawn Phillips at 775-6372 if you need to request an extension to that date or if you have any questions.

The Environmental Protection Agency has been sent these enclosures under a separate cover letter.

Sincerely,

G.L. KADEN, R.E.M.

Chief

Environmental Protection and Safety Office
