September 10, 1998

### GROUNDWATER REMEDIATION SYSTEM AT DUNN FIELD

As part of the Depot's ongoing cleanup program, the connection of the Dunn Field Groundwater Remediation System to the City of Memphis sanitary sewer system is being conducted at Dunn Field. Work will begin on Thursday, September 10, 1998 and end by Friday, September 25, 1998.

This work is part of the Depot's commitment to protect the groundwater at Dunn Field which is a valuable resource. The work will be located at the northeast corner of Dunn Field near the intersection of Hays Street and Person Avenue. The U. S. Army Corps of Engineers will be performing this work through their contractor, OHM Corporation. This work is being conducted with the oversight from the City of Memphis, Division of Public Works.

There will be some noise from the work in the road as well as traffic control measures that will be implemented. We hope this will not be a nuisance to you.

These efforts are all a part of the Depot's commitment to restore, reuse and revitalize this facility. We encourage you to attend community meetings and call us with your input or suggestions. Our next Restoration Advisory Board (RAB) meeting is September 17, 1998 at 6 p.m. in the Commander's Conference Room, Building 144 at the Depot. Park at Gate 1 and enter through the side door.

We are also hosting a Community Information Session on Saturday, September 19, 1998, from 10 a.m. to 4 p.m. at Corry Junior High School.

If you have further questions, please call Alma Black Moore, Community Relations Specialist, at (901) 544-0613.
