MEMORANDUM FOR CEHNC-PM (Julian Savage)

SUBJECT: Interim Remedial Action (IRA) Design

In the BRAC Cleanup Team (BCT) meeting on March 21, 1996, the BCT decided that the IRA design should not include a treatment at this time.

The BCT determined if the pump and treat discharge requires a pretreatment before entering the sanitary sewer system then we would cease pumping operations until a pretreatment was in place

The BCT further discussed this pretreatment in terms of utilizing available off-the shelf systems instead of reinventing an already existing system.

Please proceed with the design of the IRA with the above in mind. If you have any questions, please call me at (901) 775-4568
