Re: Results of a Soil Investigation at the Former PCP Dip Vat and Underground PCP Storage Tank  
Sites, Main Installation, Memphis Depot (Rev 1), January 21, 2004

TDEC has reviewed the above referenced document. TDEC finds this report acceptable for its intended purposes. Further, TDEC agrees with the recommendations noted in the report for installing additional monitor wells down gradient of the PCP Dip Vat (SS42 and SS43) in order to confirm that PCP leachate is not affecting groundwater; and secondly, a digging restriction be included on the deed for this parcel to protect future industrial workers from elevated PCP soil concentrations 10 feet below land surface.

If you have any questions or concerns regarding this letter, I can be reached via email at [Jim.Voyt@state.tn.us](mailto:Jim.Voyt@state.tn.us) or by phone at (615) 532-0910.

Very truly yours,

A handwritten signature in black ink, appearing to read "J. W. Morrison".
