**RE:** Dunn Field Remedial Design Investigation Work Plan  
Defense Depot Memphis Tennessee  
Memphis, Tennessee  
Site #79-736

Dear Mr. Dobbs:

The Tennessee Department of Environment and Conservation (TDEC), Division of Remediation (DoR), Memphis Environmental Field Office (MEFO) received the Dunn Field Remedial Design Investigation Work Plan for the above-referenced site on August 1, 2005. TDEC-DoR has reviewed the Report and has the following comments.

On Page 3-5; the first paragraph under Proposed Off-Depot Monitoring Wells states that four wells will be installed. Figure 3-3 indicates that five off-Depot monitoring wells will be installed. Please correct this discrepancy.

On Page 4-2; DoR believes that a 0-3" sample depth for the reevaluation of Disposal Site risk is a more appropriate depth to determine the risk associated with probable surface contact in the proposed recreational reuse areas.

Please do not hesitate to call me at (901) 368-7916 if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Evan W. Spann", followed by a checkmark.

Evan W. Spann  
Project Manager  
Division of Remediation
