Re: Approval of the Dunn field Interim Remedial Action 2007 Annual Report

Dear Mr. Dobbs:

The U.S. Environmental Protection Agency (EPA) has reviewed the referenced document. The extraction system appears to be operating consistently with past years, and monthly reporting has been timely and complete. The document is approved as submitted.

Recently the BRAC Cleanup Team agreed to shut down a number of extraction wells that appear unneeded since the fluvial SVE system came on line. EPA will be interested to learn if the ground water in that area continues to be low in contamination. If you have any questions, please contact me at 404/562-8553.

Sincerely yours,
