FISH AND WILDLIFE SERVICE
Mountain Longleaf National Wildlife Refuge
664 Powers Avenue, Suite 200
Anniston, Alabama 36205

January 22, 2013

Mr. Scott Bolton
Site Manager
Department of the Army
681 Castle Drive, Building 200
Fort McClellan, Alabama 36205

Dear Mr. Bolton:

The U.S. Fish and Wildlife Service has reviewed the Final – Revision 1 Decision Document for Portions of Baby Bains Gap Road Ranges dated December 2012 and concurs with this document as written.

The U.S. Fish and Wildlife Service Mountain Longleaf National Wildlife Refuge has installed a groundwater well near Range 25 East, Parcel 223Q. We do not currently use the well water as potable water and will monitor the contamination levels of this water before using it as such to avoid any unacceptable health risk.

Sincerely,

Sarah Clardy
Refuge Manager
Mountain Longleaf NWR
