WHEREAS, this instrument is an Environmental Covenant developed and executed  
 pursuant to The Alabama Uniform Environmental Covenants Act and the regulations  
 promulgated thereunder;

WHEREAS, Parcel Munitions Response Site – 6 (MRS-6) comprises an area totaling  
 approximately 135 acres located in the westernmost part of the Bravo Munitions Response Area

(MRA) and is bordered to the east by MRS-3 and north, south, and west by City of Anniston. It consists in part of the Bravo Engineering Evaluation/Cost Analysis (EE/CA) Sectors M3-2H Mortar Area -Passive Recreation (PR), M3-2H Mortar Area- Development (D), and M3-1L Rocket Area-D.

WHEREAS, historically, MRS-6 was used primarily as rocket and mortar ranges with a variety of explosive ordnance recovered during site characterization activities. To implement the munitions remediation in MRS-6, the site was divided into four tracts, 6-A through 6-D based on geography and required remedial actions. The remediation for Tracts 6-A and 6-B where the future land use is passive recreation was cleared to a depth of one foot. The remediation for Tracts 6-C and 6-D where the future land use is mixed development was cleared to the depth of detection. Areas that were not cleared to the depth of detection comprise the Covenant Boundary and include Tracts 6-A and 6-B.

WHEREAS, the selected "remedial action" for the Property, which has now been implemented, providing in part, for the following actions,

#### DESCRIPTION OF REMEDIAL ACTION:

WHEREAS, pursuant to the Alabama Hazardous Wastes Management and Minimization Act of 1978, (AHWMMA), Ala. Code §§ 22-30-1 to 22-30-24, as amended, the GRANTOR and assignees agreed to perform operation and maintenance activities at the Property, pursuant to an ADEM Cleanup Agreement Number AL4-210-020-562 to address the effects of the release/disposal, which includes controlling exposure to the hazardous wastes, hazardous constituents, hazardous substances, pollutants, or contaminants;

WHEREAS, the remedial action was performed in accordance with the ADEM-approved work plan and Action Memorandum and DDESB-approved explosives safety submission;

WHEREAS, detection and removal methods are not 100 percent effective, so that (munitions and explosives of concern) MEC may remain in those areas that were subjected to the remediation;

WHEREAS, the Department of Defense Manual Number 6055.09-M, Volume 7, February 29, 2008 (Administratively Reissued August 4, 2010) in V7.E3.4.2.2.1.2 states that "Areas on which a previous response has been completed, pursuant to a DDESB-approved explosives safety submission (ESS), for the stipulated reuse also qualify for "low" determinations."; and, in V7.E4.4.3.2.1 the level of construction support for areas of low probability shall be "On-call";

WHEREAS, the said Cleanup Agreement requires institutional controls to be implemented to address the effects of the release/disposal and to protect the remedy so that exposure to the potential MEC is controlled by restricting the use of the Property and the activities on the Property;

WHEREAS, implementation of the approved Cleanup Agreement has achieved risk-based cleanup levels deemed protective of public health and the environment based upon certain use restrictions imposed on the property to limit exposure to potential MEC;

WHEREAS, the potential for MEC remains in the Covenant Boundary;

WHEREAS, the purpose of this Covenant is to ensure protection of human health and the environment by placing restrictions on the Property in accordance with the approved Cleanup Agreement; and

WHEREAS, further information concerning the remediation activities, including the Administrative Record, may be obtained by contacting:
