WHEREAS, this instrument is an Environmental Covenant developed and executed pursuant to The Alabama Uniform Environmental Covenants Act and the regulations promulgated thereunder;

WHEREAS, Parcel MRS-12 comprises an area totaling approximately 140.5 acres located in the northern part of the Alpha Munitions Response Area (MRA), north of the Alabama National Guard's Military Operations in Urban Terrain (MOUT) training site, and bordered by the Charlie MRA to the east. It consists of two parcels – a large parcel to the east and a small parcel to the west which include the Alpha Engineering Evaluation/Cost Analysis (EE/CA) Sectors M6-1M Suspect Area (N)–Passive Recreation (PR), M6-1M Transect Area 2 (North)–PR, M6-1M Burn Pit–PR, and portions of M6-1M Remainder – Industrial/Active Recreation (I/AR) and M6-1M Remainder –PR and Supplemental EE/CA Sectors NT-1N and NT-2.

WHEREAS, historically, MRS-12 was used primarily as rifle, machine gun, carbine, and mortar ranges with a variety of explosive ordnance recovered during site characterization activities. To implement the munitions remediation in MRS-12, the site was divided into four tracts, 12-A through 12-D based on geography and required remedial actions. The remediation for Tract 12-D where the presence of MEC was considered to be low and likely to consist of discarded military munitions (DMM), if present, was a surface sweep. The remainder of MRS-12 was cleared to a depth of one foot with the exception of a small area, approximately 1.5 acres in the northwest corner of Tract 12-C, which was cleared to the depth of detection.

WHEREAS, the selected "remedial action" for the Property, which has now been implemented, providing in part, for the following actions,

#### DESCRIPTION OF REMEDIAL ACTION:

WHEREAS, pursuant to the Alabama Hazardous Wastes Management and Minimization Act of 1978, (AHWMMA), Ala. Code §§ 22-30-1 to 22-30-24, as amended, the GRANTOR and assignees agreed to perform operation and maintenance activities at the Property, pursuant to an ADEM Cleanup Agreement Number AL4-210-020-562 to address the effects of the release/disposal, which includes controlling exposure to the hazardous wastes, hazardous constituents, hazardous substances, pollutants, or contaminants;

WHEREAS, the remedial action was performed in accordance with the ADEM-approved work plan and Action Memorandum and DDESB-approved explosives safety submission;

WHEREAS, detection and removal methods are not 100 percent effective, so that (munitions and explosives of concern) MEC may remain in those areas that were subjected to the remediation;

WHEREAS, the Department of Defense Manual Number 6055.09-M, Volume 7, February 29, 2008 (Administratively Reissued August 4, 2010) in V7.E3.4.2.2.1.2 states that "Areas on which a previous response has been completed, pursuant to a DDESB-approved explosives safety submission (ESS), for the stipulated reuse also qualify for "low" determinations."; and, in V7.E4.4.3.2.1 the level of construction support for areas of low probability shall be "On-call";

WHEREAS, the said Cleanup Agreement requires institutional controls to be implemented to address the effects of the release/disposal and to protect the remedy so that exposure to the potential MEC is controlled by restricting the use of the Property and the activities on the Property;

WHEREAS, implementation of the approved Cleanup Agreement has achieved risk-based cleanup levels deemed protective of public health and the environment based upon certain use restrictions imposed on the property to limit exposure to potential MEC;

WHEREAS, the potential for MEC remains in the Covenant Boundary;

WHEREAS, the purpose of this Covenant is to ensure protection of human health and the environment by placing restrictions on the Property in accordance with the approved Cleanup Agreement; and

WHEREAS, further information concerning the remediation activities, including the Administrative Record, may be obtained by contacting:
