WHEREAS, this instrument is an Environmental Covenant developed and executed pursuant to The Alabama Uniform Environmental Covenants Act and the regulations promulgated thereunder;

WHEREAS, Parcel Munitions Response Site – 8 (MRS-8) comprises an area totaling approximately 175 acres located in the north-central part of the Bravo Munitions Response Area (MRA), located east of MRS-9 and west of MRS-2. It consists in part of the Bravo Engineering Evaluation/Cost Analysis (EE/CA) Sectors A1 Reconnaissance Area – Development (D), M3-1L Suspect Area 1 – Passive Recreation (PR), and M3-2M Hand Grenade Area – PR;

WHEREAS, historically, MRS-8 was used primarily for artillery and mortar ranges and small arms training with a variety of explosive ordnance recovered during site characterization and remediation activities. To implement the munitions remediation in MRS-8, the site was divided into five tracts, 8-A through 8-E based on geography and required remedial actions. The remediation for Tracts 8-A, 8-B, and 8-C where the future land use is mixed development was cleared to the depth of detection. The remediation for Tracts 8-D and 8-E where the future land use is passive recreation was cleared to a depth of one foot. Areas that were not cleared to the depth of detection comprise the Covenant Boundary and include Tracts 8-D and 8-E,

WHEREAS, the selected "remedial action" for the Property, which has now been implemented, providing in part, for the following actions,

DESCRIPTION OF REMEDIAL ACTION:

WHEREAS, pursuant to the Alabama Hazardous Wastes Management and Minimization Act of 1978, (AHWMMA), Ala. Code §§ 22-30-1 to 22-30-24, as amended, the GRANTOR and assignees agreed to perform operation and maintenance activities at the Property, pursuant to an ADEM Cleanup Agreement Number AL4-210-020-562 to address the effects of the release/disposal, which includes controlling exposure to the hazardous wastes, hazardous constituents, hazardous substances, pollutants, or contaminants;

WHEREAS, the remedial action was performed in accordance with the ADEM-approved work plan and Action Memorandum and DDESB-approved explosives safety submission;

WHEREAS, detection and removal methods are not 100 percent effective, so that (munitions and explosives of concern) MEC may remain in those areas that were subjected to the remediation;

WHEREAS, the Department of Defense Manual Number 6055.09-M, Volume 7, February 29, 2008 (Administratively Reissued August 4, 2010) in V7.E3.4.2.2.1.2 states that "Areas on which a previous response has been completed, pursuant to a DDESB-approved explosives safety submission (ESS), for the stipulated reuse also qualify for "low" determination"; and, in V7.E4.4.3.2.1 the level of construction support for areas of low probability shall be "On-call";

WHEREAS, the said Cleanup Agreement requires institutional controls to be implemented to address the effects of the release/disposal and to protect the remedy so that exposure to the potential MEC is controlled by restricting the use of the Property and the activities on the Property;

WHEREAS, implementation of the approved Cleanup Agreement has achieved risk-based cleanup levels deemed protective of public health and the environment based upon certain use restrictions imposed on the property to limit exposure to potential MEC;

WHEREAS, the potential for MEC remains in the confines of the Covenant Boundary;

WHEREAS, the purpose of this Covenant is to ensure protection of human health and the environment by placing restrictions on the Property in accordance with the approved Cleanup

Agreement; and

WHEREAS, further information concerning the remediation activities, including the Administrative Record, may be obtained by contacting:
