### -Variance Report -

I. Description: (by the person identifying the change)

**FINAL SITE-SPECIFIC FIELD SAMPLING PLAN, FORMER RANGE 42, PARCEL 96Q; RANGE, CHOCCOLOCCO CORRIDOR, PARCEL 145Q-X; AND IMPACT AREA, CHOCCOLOCCO CORRIDOR, PARCEL 148Q-X.**

The Final Site-Specific Field Sampling Plan (FSSFSP) proposed a surface water sample and sediment sample at sample location HR-145Q-SW/SD01. Surface water and sediment were not collected at this location. A depositional soil sample HR-145Q-DEP01 was collected.

Identified by: Leigh Yates, Risk Assessment Specialist

Date: 9-20-02

II. Justification for Variance:

The FSSFSP proposed a surface water sample and sediment sample at sample location HR-145Q-SW/SD01. Sample location HR-145Q-SW/SD01 was proposed in a swampy area in the eastern portion of Parcel 145Q-X. However, surface water and sediment were not present during sample collection. Several attempts were made to collect samples, but all attempts were unsuccessful. Therefore, a depositional soil sample HR-145Q-DEP01 was collected at that location to determine the presence or absence of contamination.

III. Applicable Document/Work Plan: (by the person identifying the change)

## -Variance Report -

**I. Description:** (by the person identifying the change)

**FINAL SITE-SPECIFIC FIELD SAMPLING PLAN, FORMER RANGE 41, PARCEL 95Q AND IMPACT AREA, CHOCCOLOCCO CORRIDOR, PARCEL 131Q-X. FORMER RANGE 42, PARCEL 96Q AND PARCEL 145Q-X; AND IMPACT AREA, CHOCCOLOCCO CORRIDOR, PARCEL 148Q-X**

The Final Site-Specific Field Sampling Plan (FSSFSP) proposed a surface water sample and sediment sample at sample location HR-145Q-SW/SD02. This sample location was moved approximately 1700 northwest of its proposed location.

**Identified by:** Leigh Yates, Risk Assessment Specialist

**Date:** 9-19-02

**II. Justification for Variance:**

The FSSFSP inadvertently proposed sample locations HR-131Q-SW\SD01 and HR-145Q-SW\SD02 at the same location. A surface water sample and sediment sample were collected at sample location HR-131Q-SW/SD01 on July 18, 2002. Therefore, a decision was made to move sample location HR-145Q-SW/SD02 approximately 1700 feet upstream and northwest of its proposed location. Surface water and sediment samples were successfully collected at that location on September 6, 2002. This variance will not alter the scope or intent of the site investigations at Ranges 41 and 42.
