

# National Dredging Quality Management Program (DQM)

# DREDGE PLANT INSTRUMENTATION PLAN (DPIP) PUNCH LIST—HOPPERS

The Dredge Plant Instrumentation Plan (DPIP) for hopper dredges shall include the following as a minimum.

**Note**: The DPIP must have a Table of Contents in the following order and tabs separating sections.

Cover Page Dredge Name Date Photo of Plant

Table of Contents

New Page Dredge Contacts

Dredging Company

- Dredge Point of Contact On Site
- Phone Number
- Email Address

Dredge Monitoring System Provider

- Dredge Monitoring System Point of Contact
- Telephone Number
- Email Address

New Page

Table of Dredge Characteristics

- Dimensions of Dredge
- Dimensions of Hopper
- Method of Disposal
- Capacity
- Minimum and Maximum Digging Depth
- Minimum and Maximum Drafts and Displacements

- o Any Calculation Done External to the Instrumentation
- $\circ~$  Sensor Location with Referenced Dimensions, Including the Pipe Diameter
- Calibration Procedure
- Pump RPM
  - Brand Name, Model, and Accuracy
  - Any Calculation Done External to the Instrumentation
  - Sensor Location with Referenced Dimensions
  - $\circ$  Calibration Procedure
- Pumpout (If Instrumented)
  - Brand Name, Model, and Accuracy
  - Any Calculation Done External to the Instrumentation
  - Sensor Location with Referenced Dimensions
  - Calibration Procedure

### Calculated Parameters

- Displacement
  - Method Used by the Contractor to Calculate Displacement
  - Tables Listing (Fresh and Salt Water) Displacement as a Function of Draft in Feet and Tenths of Feet
- Hopper Volume
  - Method Used by the Contractor to Calculate Hopper Volume
  - Table Listing the Hopper Volume as a Function of Hopper Ullage in Feet and Tenths of Feet
  - Description of the Datum for Ullage Sounding Measurements
- Drag Head Position
  - Method Used by the Contractor to Calculate the Drag Head Position
- Load Number
  - Method Used to Increment the Load Number

#### **Quality Control**

- Description of the Contractor's Quality Control Process
- Log of Sensor Calibrations, Repairs, and Modifications

### Appendices

- Hydrostatic Curves
- Certified Displacement and Volume Tables
- Legible Dimensioned Drawings of the Dredge with Units in Feet
  - $\circ~$  A Typical Plan of the Dredge Showing the Following:
    - Overall Dredge and Hopper Dimensions
    - Locations of Required Sensors Referenced to Uniform Longitudinal and Transverse Reference Points
    - Distance Between the Draft Sensors
    - Distance Between the Ullage Sensors

- Dimensions of the Dragarm
- $\circ~$  Profile View of the Dredge Showing the Following:
  - Overall Dredge and Hopper Dimensions
  - Distance Between the Draft Sensors and Draftmarks
  - Locations of Required Sensors Referenced to Uniform Vertical and Longitudinal Reference Points
- Typical Vessel Cross Section Through the Hopper
- Sensor Manuals and Certificates of Calibration
