TECHNICAL SUPPORT BRANCH

NAVIGATION BULLETIN NO. 18-14

NOTICE TO NAVIGATION INTERESTS:

TENNESSEE-TOMBIGBEE WATERWAY, MISSISSIPPI

SHOAL, MILE 366.2, ABERDEEN LAKE

A significant shoal has developed on the west side of the river near mile 366.2. The navigation channel width has been restricted to approximately 150 feet. The Motor Vessel TennTom and crane barge R.W. Davis are in route and expected to arrive later this week to remove the shoal. The Plant will offload the dredged material into a nearby disposal area on the east side of the river. Dredging operations are expected to continue for three weeks. Navigation traffic is requested to transit this reach by staying close to the red side of the channel with caution at no wake speed. The Corps Plant can be reached on marine channel 16 while working in that area.

For further information please contact Roger Wilson, Jr. at the Tennessee-Tombigbee Project Management Office at (662) 327-2142.

CARL E. DYESS
Chief, Navigation Section
