

## Notice to Navigation Interests

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG.

May 17, 2018

TECHNICAL SUPPORT BRANCH

NAVIGATION BULLETIN NO. 18-35

NOTICE TO NAVIGATION INTERESTS:

### TENNESSEE-TOMBIGBEE WATERWAY, MISSISSIPPI

#### SHOAL, MILE 332.2, ALICEVILLE LAKE

A significant shoal has developed on the west side of the river near mile 332.2. The navigation channel width has been restricted to approximately 180 feet. The Motor Vessel TennTom and crane barge R.W. Davis are currently on site and mechanically dredging the shoal. The Plant will offload the dredged material into a nearby disposal area on the east side of the river. Dredging operations are expected to continue for three weeks. Navigation traffic is requested to transit this reach by staying close to the red side of the channel with caution at no wake speed. The Corps Plant can be reached on marine channel 16 while working in that area.

For further information please contact Roger Wilson, Jr. at the Tennessee-Tombigbee Project Management Office at (662) 327-2142.

CARL E. DYESS  
Chief, Navigation Section
