

Alabama Coastal Comprehensive Plan (ACCP)

Vision Statement:

A vibrant coastal Alabama with a healthy and resilient economy, environment, and social foundation

In an effort to better facilitate the ACCP process, we would be pleased to have your written comments identifying your 'coastal vision' for today and the future. Your valuable insight will help formulate a plan to address natural and man-made vulnerabilities for a more resilient coastal Alabama to allow current and future generations to balance environmental, economical, and societal needs. Your input will help formulate an existing and future coastal vision, and provide a roadmap for the overall plan's development. Please complete this sheet to capture your coastal vision (additional space on next page).

Today –

Ten Year Coastal Vision –

Twenty-Five Year Coastal Vision –

Fifty-Year Coastal Vision –
