## Mobile Harbor General Reevaluation Report

**MOBILE, Ala.** – The U.S. Army Corps of Engineers, Mobile District (USACE), releases a biweekly update every other Wednesday on the current status of the Mobile Harbor General Reevaluation Report (GRR). Each update provides an overview of recent activities under the study, highlights upcoming milestones, and provides links to important changes on the project website.

### Current Updates:

- Efforts to select a venue for the next public meeting in September continue. The specific date and time are dependent upon venue availability.
- Analyses of the benthic and fish sampling from last fall are nearly complete. Maps are being generated depicting the baseline for the wetlands, seagrasses, and oysters. Determination of salinity tolerances for the resources continue.
- The economic analysis continues to be refined. Vessel operating costs are being revised per recently released guidance. This information updates vessel costs to better represent current values and future projected costs. We continue to work to capture traffic changes that will result from the development of the new Walmart distribution center. This added information will help determine the feasibility of including widening components with the deepening options
- We have developed a modified design of the turning basin at Choctaw Pass based on the results of the recently conducted ship simulation study. Development of a preliminary cost estimate is underway.
- Refinement of the hydrodynamic model is nearly complete and the team is conducting sensitivity runs to evaluate the model's performance.

**Public Involvement:** As the study progresses, interested parties have several avenues in which they can receive updates on the project. Throughout the process, Mobile District will host a series of public meetings/engagements. Mobile District will announce the dates and locations of future public engagements in news releases, on the project website, by listserve, social media, biweekly updates and quarterly bulletins.

U.S. ARMY CORPS OF ENGINEERS – MOBILE DISTRICT  
109 SAINT JOSEPH STREET, MOBILE, ALA. 36602-3630
