

Tennessee-Tombigbee Waterway

The Tennessee-Tombigbee Waterway is a navigable link between the lower Tennessee Valley and the Gulf of Mexico. Stretching 234 miles through northeast Mississippi and west Alabama, the "Chain of Lakes" Waterway system has ten lakes, ten locks, and a series of dams.

The Tennessee-Tombigbee Waterway has thousands of acres of land and water managed by the U.S. Army Corps of Engineers and local state agencies for fisheries, wildlife, forestry, and recreation.

Developed parks and facilities include beaches, campgrounds, nature trails, picnic areas, playgrounds, visitor centers, and launch ramps.

You are invited to visit and enjoy all of the Corps of Engineers facilities on the Tennessee-Tombigbee. We ask only that you obey posted regulations and help us take care of the facilities so that others may enjoy them as well.
