APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 4/27/2021
 ORM Number: SAM-2015-01186-NJW
 Associated JDs: N/A
 Review Area Location¹: State/Territory: Alabama City: Eufala County/Parish/Borough: Barbour
 Center Coordinates of Review Area: Latitude 31.992192 Longitude -85.108839

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: The project will occur in a highly disturbed parcel which is located within a larger parcel owned by the applicant. The jurisdictional determination was requested for the region along previously disturbed and filled areas of a pre-existing golf course (as shown on the attached aerial map as red and orange pathways within the parcel). The requested review area exists only within the existing disturbed and filled areas within the golf course fairway, and any proposed work will be located within the previously disturbed pathways. Predominant soils within these existing pathways are non-hydric and well drained Fuquay loamy sand (80%) profile. The review area is bordered on the east and west ends by undeveloped natural areas with soils indicative of stream terraces and toeslopes and an isolated pond located in the central southern area, but as previously discussed, all proposed work will be conducted within the existing disturbed golf course development. Additionally, the FEMA flood database shows the entire review area as located within Zone X, or minimal flood hazard.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

C. Clean Water Act Section 404

Territorial Seas and Traditional Navigable Waters ((a)(1) waters): ³			
(a)(1) Name	(a)(1) Size	(a)(1) Criteria	Rationale for (a)(1) Determination
N/A.	N/A.	N/A.	N/A.

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
