REVIEW AREA ONLY INCLUDES DRY LAND: This site is an erosional feature (gully) in uplands that flows down gradient to a jurisdictional stream. This ditch has no bed and bank and no hydric soils. Some facultative wetland vegetation is present along the margins. Wetland hydrology is technically present in the form of drift lines. This ditch appears to only flow during heavy rainfall events.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
