¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Based on a review of available desktop resources including Web Soil Survey mapping, topographic mapping, and historic aerial photography, the project area consists of upland/non-wetland dry lands. Aerial photography provided by the agent verifies that the specified 0.55 miles of open cut for the water line replacement will occur along Chandler Mountain Road inside the road right of way. Desktop resources evaluated indicate no wetlands, streams, or tributary features in the project area. The agent also clarified that the water meters and booster station exist in previously determined upland facilities and individual water meters will be replaced only if required.
