¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Based on review of available desktop resources including Web Soil Survey mapping, USGS topographic mapping, aerial photography, floodplain maps, National Wetland Inventory maps, and current site-specific photos, the JD review area consists of upland/non-wetland, dry lands. Aerial photography shows the area that would be impacted by the proposed playground construction on the partially developed and regularly maintained parcel in Chambers County, is a dry land area. Desktop resources evaluated also indicate the JD review area lacks any streams or tributary features.
