¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Based on review of available desktop resources including Web Soil Survey mapping, USGS topographic mapping, and aerial photography, the JD review area consists of upland/non-wetland, dry lands. Aerial photography shows the area that would be impacted by the proposed new pump station along Franklin Street in Dallas County, is a maintained dry land area consisting of a vacant lot within an existing developed downtown business area of Selma. Desktop resources evaluated also indicate the JD review area lacks any streams or tributary features.
