¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

| Excluded waters ((b)(1) – (b)(12)): ⁴ | | | | |
|--|----------------|-------------|---|---|
| Exclusion Name | Exclusion Size | | Exclusion ⁵ | Rationale for Exclusion Determination |
| Eph3 | 67 | linear feet | (b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool. | This Eph3 feature may have been created in uplands to convey storm water north from the east development (outside review area) currently under way. |

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- ☒ Information submitted by, or on behalf of, the applicant/consultant: [Randy Ellis](#)

This information [is](#) sufficient for purposes of this AJD.

Rationale: [N/A](#)

- ☒ Data sheets prepared by the Corps: [Angela Rangel](#)

- ☐ Photographs: [Select](#). Title(s) and/or date(s).

- ☐ Corps site visit(s) conducted on: [Date\(s\)](#).

- ☐ Previous Jurisdictional Determinations (AJDs or PJDs): [ORM Number\(s\) and date\(s\)](#).

- ☐ Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)

- ☒ USDA NRCS Soil Survey: [Hancock Co Soils Survey](#), [Web Soil](#)

- ☐ USFWS NWI maps: [Title\(s\) and/or date\(s\)](#).

- ☒ USGS topographic maps: [ESRI provided](#)

Other data sources used to aid in this determination:

| Data Source (select) | Name and/or date and other relevant information |
|--|---|
| USGS Sources | N/A. |
| USDA Sources | N/A. |
| NOAA Sources | N/A. |
| USACE Sources | N/A. |
| State/Local/Tribal Sources | N/A. |
| Other Sources | N/A. |

B. Typical year assessment(s): [N/A or provide typical year assessment for each relevant data source used to support the conclusions in the AJD.](#)

C. Additional comments to support AJD: [The USGS topo shows a stream in the area where it is now developed, disturbed, or considered upland. Eph 3, east of Eph 1 and 2, receives stormwater from an area off-site that is currently under development and conveys water to Eph2 . This stream only flows during stormwater events.](#)

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
