which the City of Verona proposes to improve College Avenue, extending from the Highway 6 intersection to 1,060 linear feet south of the intersection. Improvements include repairing existing base failures, adding a turn lane at the intersection with Highway 6, and overlaying the entire project with two (2) inches of asphalt. Based on evaluation of documentation provided by the agent and review of publicly available desktop resources (WebSoil Survey mapping, NWI maps, USGS Topo maps, USGS National Mapper NHD layer, FEMA FIRM mapping, and aerial photography) the review area consists entirely of approximately 0.90-acre of non-jurisdictional upland/dry land area that encompasses existing paved roadway, maintained road right-of-way, part of a maintained grassed field, and part of an existing access drive and parking area associated with an existing business west of College Avenue.
