¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

Based on review of information provided by the Three Rivers Planning and Development District and other available desktop resources including Web Soil Survey mapping, USGS topographic mapping, USFWS NWI mapping, and aerial photography, the approximately 0.95-acre review area for the lift station construction and sewer main replacement extending southeast from the Cooper Tire and Rubber Company facility between South Green Street, Whitaker Drive, and Triangle Street in Tupelo consists of upland/non-wetland, dry lands. Aerial photography indicates the 0.95-acre area that would be impacted by the proposed work is located within historically disturbed and previously developed areas and along the outer edge of an annually utilized row crop field extending to an existing sewer lift station. There are no wetland and/or stream features present within the project area alignment.
