<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:**

Based on review of information provided by the Alabama Dept. of Labor, Abandoned Mine Land Office and other available desktop resources including Web Soil Survey mapping, USGS topographic mapping, aerial photography, and current site-specific photos, the approximately 1.0-acre JD review area consists of upland/non-wetland, dry lands. Site-specific photographs demonstrate the up to 1.0-acre area that would be impacted by the proposed reclamation of the abandoned mine subsidence is located within an area that was utilized as a baseball field for many years and is still maintained as a grassed area utilized by local residents for recreation. The approximately 1.0-acre review area lacks any wetlands, tributaries, or drainage features.
