¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Based on review of information provided by the agent, Terracon Consultants, on behalf of Verizon Wireless, and other available desktop resources including Web Soil Survey mapping, USGS topographic mapping, aerial photography, and current site-specific photos, the approximately 0.5-acre telecommunication tower compound JD review area consists of upland/non-wetland, dry lands. Site-specific photographs and documentation submitted indicate the area is located within a larger 10.39-acre parcel of land that has been grubbed, graded, and maintained and routinely mowed for over 20 years and contains an existing building and parking area along the east side of the property. The 0.5-acre review area lacks any tributaries, or drainage features, and does not support hydric soils or a hydrophytic vegetation community. Aerial photography suggests small portions of the review area may hold rainfall at times however any water ponding is of insufficient duration to establish and maintain hydric soils or vegetation.
