Re: US Army COE,
Nationwide Permit No. 44
WQC No. WQC2020071

Pursuant to Section 401 of the Federal Water Pollution Control Act (33 U. S. C. 1251, 1341), the Office of Pollution Control (OPC) issues this Certification, after public notice and opportunity for public hearing, to the U.S. Army Corps of Engineers, an applicant for a Federal License or permit to conduct the following activity:

US Army COE, Nationwide Permit No. 44:

Nationwide Permits (NWP) are general permits issued on a nationwide basis to streamline the authorization of activities that have no more than minimal and cumulative adverse effects on the aquatic environment. The U.S. Army Corps of Engineers issues NWPs to authorize certain activities that require Department of the Army permits under Section 404 of the Clean Water Act and/or Section 10 of the Rivers and Harbors Act of 1899.

44. *Mining Activities*. Discharges of dredged or fill material into non-tidal waters of the United States for mining activities, except for coal mining activities, provided the activity meets all of the following criteria:

(a) For mining activities involving discharges of dredged or fill material into non-tidal wetlands, the discharge must not cause the loss of greater than 1/2-acre of non-tidal wetlands;

(b) For mining activities involving discharges of dredged or fill material in non-tidal open waters (e.g., rivers, streams, lakes, and ponds) or work in non-tidal navigable waters of the United States (i.e., section 10 waters), the mined area, including permanent and temporary impacts due to discharges of dredged or fill material into jurisdictional waters, must not exceed 1/2-acre; and

December 11, 2020

- (c) The acreage loss under paragraph (a) plus the acreage impact under paragraph (b) does not exceed 1/2-acre.

This NWP does not authorize discharges into non-tidal wetlands adjacent to tidal waters.

Notification: The permittee must submit a pre-construction notification to the district engineer prior to commencing the activity. (See general condition 32.) If reclamation is required by other statutes, then a copy of the final reclamation plan must be submitted with the pre-construction notification. (Authorities: Sections 10 and 404) [NWP No. 44, WQC2020071].

On October 29, 2020, the Department issued a letter stating intentions to deny the project based on the concern that the proposed activity in conjunction with other activities may result in adverse cumulative impacts. As required for Water Quality Certification as set forth in 11 Mississippi Administrative Code Part 6, Chapter 1, Subchapter 3, the Department has provided 30 days for these concerns to be addressed. To date no further correspondence regarding this denial has been received by the Department. Therefore, the Department denies your request for a Section 401 Water Quality Certification.

Chapter 3 Section VI, Part A of the State of Mississippi Water Quality Certification Regulations provides as follows:

2. Within thirty days after the date the Department denies and/or revokes certification, an applicant may file a written request for an informal review with the Department. The Department shall fix the time and place of such informal review and shall notify the applicant thereof.
3. Within thirty days after (1) the date the Department denies certification or (2) the date of the informal review in which the Department makes a decision to continue to deny certification, the applicant may file a written request for a formal hearing before the Permit Board. The request shall set forth grounds for the hearing request and be made in accordance with Miss. Code Ann. 49-17-29(4)(b).

If you have any questions, please contact Leah Drinnon of my staff at (601) 961-5624.

Sincerely,

Chris Sanders, P.E. BCEE,
Office of Pollution Control Director
