SPECIAL PUBLIC NOTICE
U.S. ARMY CORPS OF ENGINEERS

NATIONWIDE PERMIT REISSUANCE REQUEST FOR COMMENTS

On June 1, 2016, the U.S. Army Corps of Engineers published in the Federal Register its proposal to reissue the 50 existing nationwide permits (NWP) and issue two new NWP.

Nationwide permits are general permits issued on a nationwide basis to streamline the authorization of activities that result in no more than minimal individual and cumulative adverse environmental effects. Many of the proposed NWP require notification to the district engineer before commencing those activities, to ensure that the activities authorized by those NWP cause no more than minimal individual and cumulative adverse environmental effects.

National Issues Concerning the Proposed NWP: The Federal Register notice is the public's opportunity to comment on the proposed NWP, general conditions, and definitions. Comments on national issues relating to these NWP should be submitted to docket number COE-2015-0017 at www.regulations.gov, or by email to NWP2017@usace.army.mil or by mail to Headquarters, U.S. Army Corps of Engineers, Directorate of Civil Works, Attention: CECW-CO-R, 441 G Street, N.W., Washington, D.C. 20314-1000. Instructions for submitting comments are provided in the June 1, 2016 Federal Register notice. Comments on the proposed NWP are due by August 1, 2016.

Regional Issues Concerning the Proposed NWP, Including Regional Conditioning: Division engineers are authorized to add regional conditions specific to the needs and/or requirements of a particular region or state. Regional conditions are important mechanisms to ensure that the adverse environmental effects of activities authorized by the NWP are no more than minimal, both individually and cumulatively. Division engineers may also suspend or revoke specific NWP in certain geographic areas (e.g., states or watersheds) or high-value aquatic systems where the adverse environmental effects caused by activities authorized by those NWP may be more than minimal. An enclosure for this public notice (Enclosure 1) provides the proposed regional condition currently under consideration by the Mobile District for Alabama. The Mobile District is seeking comments on the proposed regional condition and seeking comments on the need for additional regional conditions to help ensure that the adverse environmental effects of activities authorized by the proposed NWP are no more than minimal, individually and cumulatively. Unless otherwise noted, all proposed regional conditions listed on this enclosure are applicable for activities in Alabama. **Comments on regional issues relating to the proposed NWP and proposed regional condition should be sent to the District Commander, U.S. Army Engineer District, Mobile, Post Office Box 2288, Mobile, Alabama 36628-0001, Attention: Regulatory Division.** If you have any questions concerning this publication, please contact Mr. Michael Moxey, Special Project Manager, via e-mail at michael.b.moxey@usace.army.mil or telephone number (251) 690-2658. **Comments relating to regional conditions are due by July 22, 2016 and should refer to special**

project number SAM-2016-00407-MBM. Similar public notices proposing regional conditions in other regions or States are being published concurrently by other division or district offices.

After the final NWP are issued, the final regional conditions will be issued after they are approved by the Division Commander. After the final NWP are issued, States and Tribes will make their Clean Water Act Section 401 (401) water quality certification and States will make their Coastal Zone Management Act (CZMA) consistency determination decisions. The 401/CZMA decisions must be made within 90 days of the Federal Register notice announcing the issuance of the NWPs. The final NWPs will go into effect on March 19, 2017.

Draft decision documents for each of the proposed NWPs, which include environmental documentation prepared for the purposes of the National Environmental Policy Act, have been written by Corps Headquarters. The decision documents will address compliance of the NWPs with the requirements for issuance under the Corps general permit authority. These documents, as well as the proposed NWPs, are available for viewing at www.regulations.gov, docket number COE-2015-0017. Final decision documents will be prepared for the NWPs that are issued. In addition, the final national NWP decision documents will be supplemented by division engineers to address their decisions concerning regional conditions for the NWPs.

Enclosed is an index of the proposed NWPs and conditions. Anyone wishing to provide comments may obtain a full text copy of the NWPs through the Corps Home Page at <http://www.usace.army.mil/Missions/CivilWorks/RegulatoryProgramandPermits/NationwidePermits.aspx>, at www.regulations.gov in docket number COE-2015-0017, or at the Federal Register at <https://www.gpo.gov/fdsys/pkg/FR-2016-06-01/pdf/2016-12083.pdf>.

PUBLIC NOTICE NO. SAM-2016-00407-MBM

Enclosure 1.

The text of the proposed special condition to be added to NWP verifications is as follows:

Incidents where any individuals of [insert species name or general category of species (e.g., fish, whale, abalone, sea turtle, coral, or marine plant species) as appropriate for your district] listed by NOAA Fisheries under the Endangered Species Act appear to be injured or killed as a result of discharges of dredged or fill material into waters of the United States or structures or work in navigable waters of the United States authorized by this NWP shall be reported to NOAA Fisheries, Office of Protected Resources at (301) 713-1401 and the Regulatory Office of the [insert name of Corps district] District of the U.S. Army Corps of Engineers at [insert district's phone number]. The finder should leave the plant or animal alone, make note of any circumstances likely causing the death or injury, note the location and number of individuals involved and, if possible, take photographs. Adult animals should not be disturbed unless circumstances arise where they are obviously injured or killed by discharge exposure, or some unnatural cause. The finder may be asked to carry out instructions provided by NOAA Fisheries, Office of Protected Resources, to collect specimens or take other measures to ensure that evidence intrinsic to the specimen is preserved.

The text of the special condition has placeholders for the district name and a district telephone number, as well as placeholders for listing the particular species or general categories of species occurring in the Corps district.
