Mobile District
Permit Application No. SAM-2024-00910-DJL

JOINT PUBLIC NOTICE
U.S. ARMY CORPS OF ENGINEERS
(USACE)

**ALABAMA DEPARTMENT OF ENVIRONMENTAL
MANAGEMENT (ADEM)**

TO WHOM IT MAY CONCERN: The Mobile District of the U.S. Army Corps of Engineers (Corps) has received an application for a Department of the Army permit pursuant to Section 404 of the Clean Water Act (33 U.S.C. §1344) **and/or** Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. §403). The purpose of this public notice is to solicit comments from the public regarding the work described below:

APPLICANT: Kerry Cambron
Beaching Good Times, LLC
4181 Thorny Ridge Trail
Lebanon, Ohio 45036

AGENT: Thomas Hutchings
EcoSolutions, Inc
P.O. Box 361
Montrose, Alabama 36559

WATERWAY AND LOCATION: The project would affect waters of the United States associated with the Bon Secour River. The project/review area is located at 18295 Britton Lane; in Section 38, Township 8 South, Range 4 East; at Latitude 30.314676 and Longitude -87.709166; in Gulf Shores, Baldwin County, Alabama.

EXISTING CONDITIONS: The lot located at 18295 Britton Lane is an approximately 1.4-acre undeveloped parcel containing 1.3 acres of palustrine forested wetlands.

PROJECT PURPOSE:

Basic: Provide buildable uplands for the construction of a single-family residence

Overall: Construction of a single-family residence with detached side wing and associated driveway.

PROPOSED WORK: The applicant requests authorization to discharge 286 cubic yards of commercially obtained, clean sandy fill within 0.18 acres of forested wetlands, for the construction of a single-family residence and a corresponding driveway.

AVOIDANCE AND MINIMIZATION: The applicant has provided the following information in support of efforts to avoid and/or minimize impacts to the aquatic environment: The applicant has stated that complete avoidance is unavoidable due to the absence of available uplands within the 1.4-acre project site, which contains 1.3 acres of wetlands. The proposed project has been designed to minimize wetland fill impacts and utilize a purchased easement on the western side of the property to avoid wetland fill for the driveway. At this time, The Corps, Mobile District, has not yet verified the adequacy of the applicant's avoidance and minimization efforts.

COMPENSATORY MITIGATION: The applicant offered the following compensatory mitigation plan to offset unavoidable functional loss to the aquatic environment: The applicant proposes to purchase credits through a USACE approved mitigation bank prior to the discharge of fill material into waters of the United States..

CULTURAL RESOURCES:

The Corps is evaluating the undertaking for effects to historic properties as required under Section 106 of the National Historic Preservation Act. This public notice serves to inform the public of the proposed undertaking and invites comments including those from local, State, and Federal government Agencies with respect to historic resources. Our final determination relative to historic resource impacts may be subject to additional coordination with the State Historic Preservation Officer, federally recognized tribes and other interested parties.

The District Engineer's final eligibility and effect determination will be based upon coordination with the SHPO and/or THPO, as appropriate and required, and with full consideration given to the proposed undertaking's potential direct and indirect effects on historic properties within the Corps-identified permit area.

ENDANGERED SPECIES: The Corps has performed an initial review of the application, the U.S. Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPaC) to determine if any threatened, endangered, proposed, or candidate species, as well as the proposed and final designated critical habitat may occur within the boundary of the proposed project. Based on this initial review, the Corps has made a preliminary determination that the proposed project will not affect any listed species or critical habitat.

Table 1: ESA-listed species and/or critical habitat potentially present in the action area.

Species Common Name and/or Critical Habitat Name	Scientific Name	Federal Status

Alabama red-bellied turtle	<i>Pseudemys alabamensis</i>	Endangered
Alligator snapping turtle	<i>Macrochelys temminckii</i>	Proposed Threatened
Eastern black rail	<i>Laterallus jamaicensis</i> ssp. <i>Jamaicensis</i>	Threatened
Monarch butterfly	<i>Danaus Plexippus</i>	Proposed Threatened
Rufa red knot	<i>Calidris canutus rufa</i>	Threatened
Tricolored bat	<i>Perimyotis subfalcatus</i>	Proposed Endangered

Pursuant to Section 7 ESA, any required consultation with the Service(s) will be conducted in accordance with 50 CFR part 402. The USACE is the lead Federal Agency for ESA consultation for the proposed action. Any required consultation will be completed by USACE.

This notice serves as request to the U.S. Fish and Wildlife Service for any additional information on whether any listed or proposed to be listed endangered or threatened species or critical habitat may be present in the area which would be affected by the proposed activity.

NAVIGATION: The proposed structure or activity is not located in the vicinity of a federal navigation channel.

SECTION 408: The applicant will not require permission under Section 14 of the Rivers and Harbors Act (33 USC 408) because the activity, in whole or in part, would not alter, occupy, or use a Corps Civil Works project.

WATER QUALITY CERTIFICATION: The applicant has applied for certification from the State of Alabama in accordance with Section 401(a)(1) of the Clean Water Act and for Coastal Zone Management (CZM) consistency concurrence in accordance with the Alabama Coastal Area Management Program. Upon completion of the required advertising and public comment review, a determination relative to Water Quality Certification and CZM consistency will be made by the Alabama Department of Environmental Management (ADEM). This notice serves as a notification to the Administrator of the Environmental Protection Agency (EPA) requesting a determination of potential water quality impacts to neighboring jurisdictions, pursuant to section 401(a)(2) of the Clean Water Act.

NOTE: This public notice is being issued based on information furnished by the applicant. This information has not been verified or evaluated to ensure compliance with laws and regulation governing the regulatory program. The geographic extent of aquatic

resources within the proposed project area that either are, or are presumed to be, within the Corps jurisdiction has not been verified by Corps personnel.

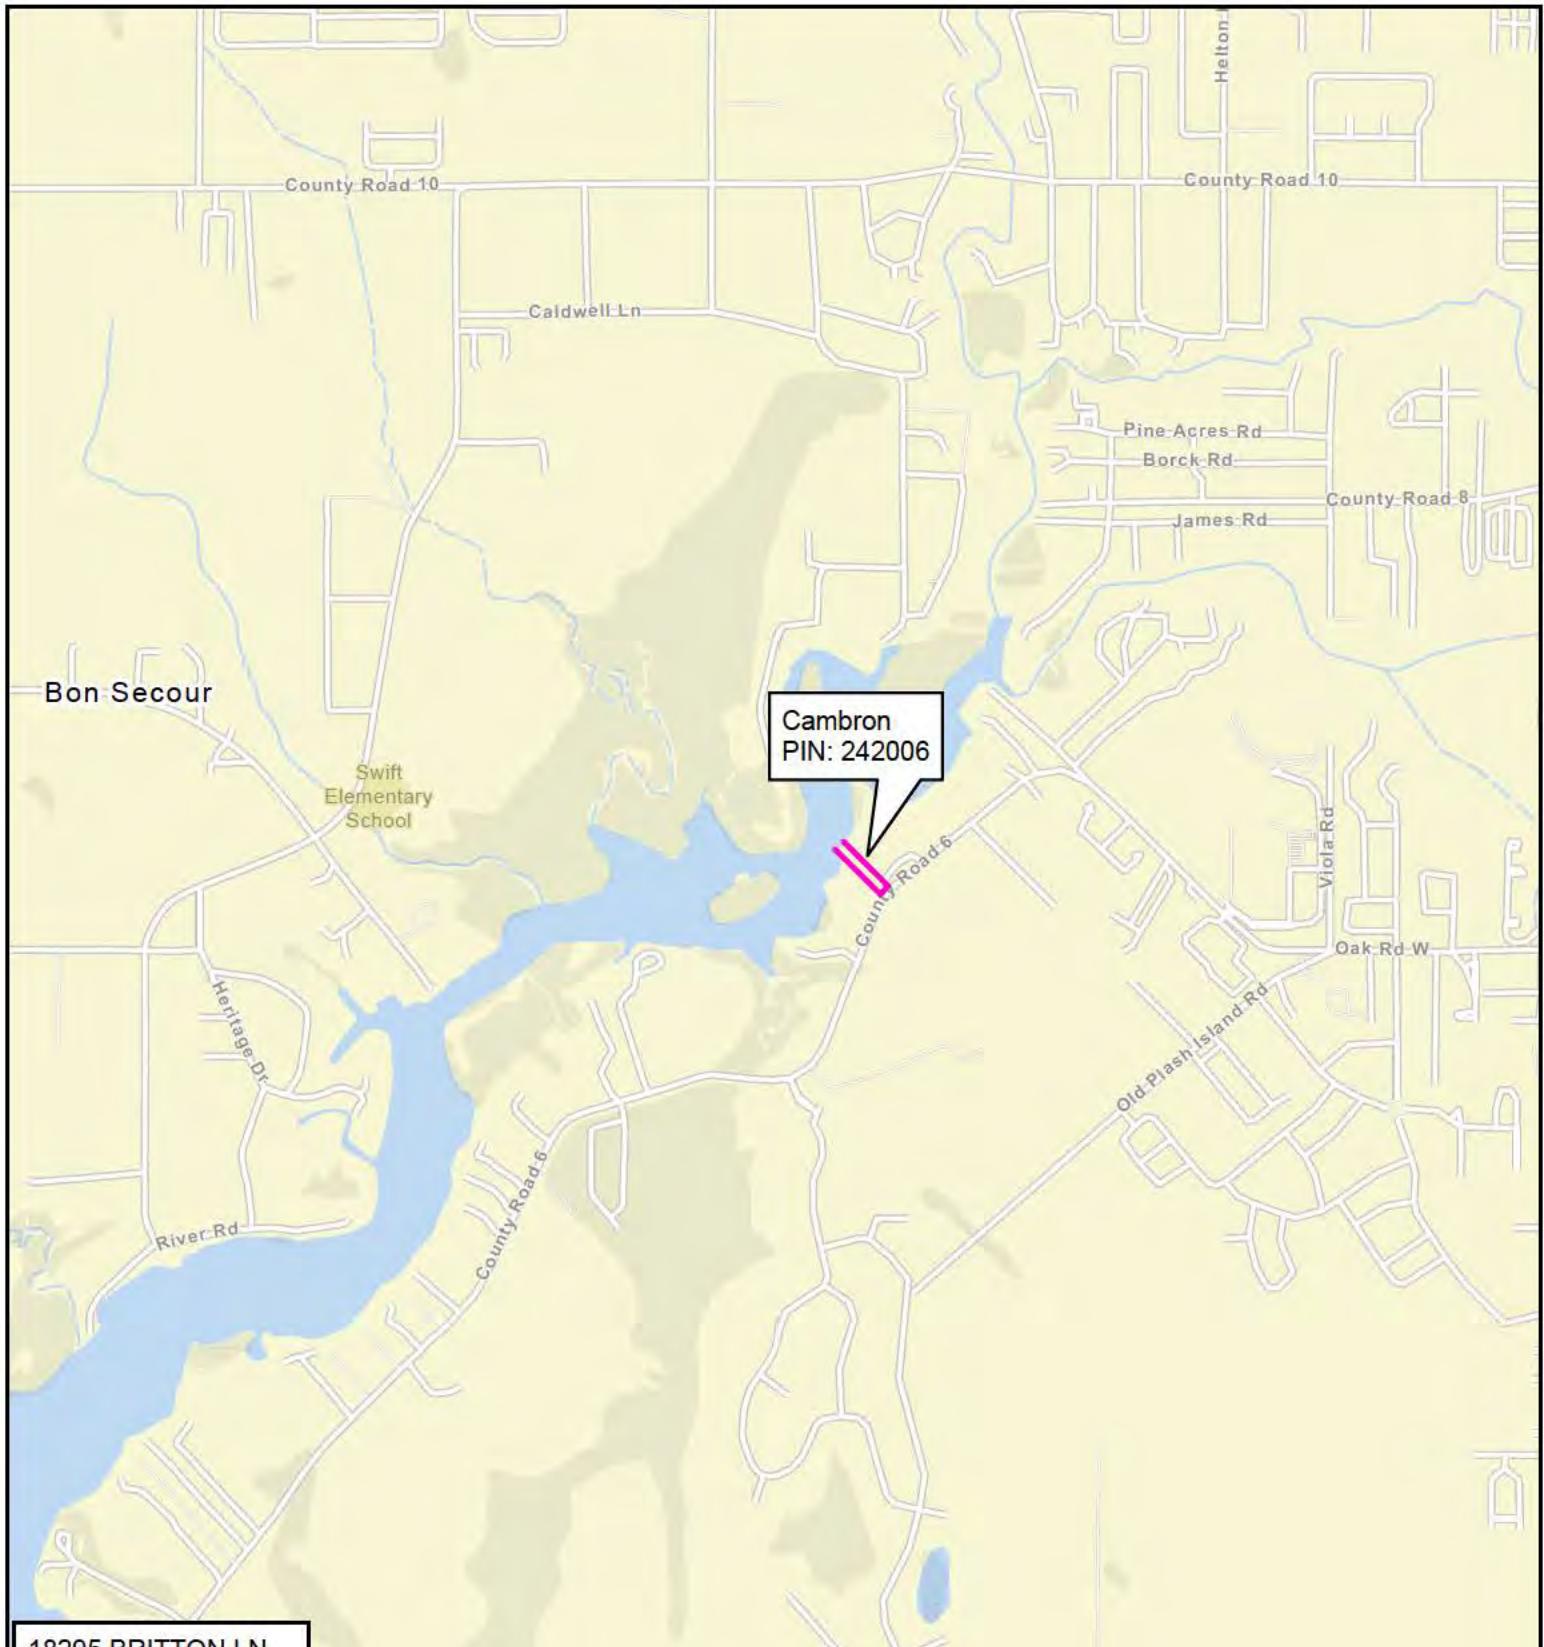

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including cumulative impacts thereof; among these are conservation, economics, esthetics, general environmental concerns, wetlands, historical properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food, and fiber production, mineral needs, considerations of property ownership, and in general, the needs and welfare of the people. Evaluation of the impact of the activity on the public interest will also include application of the guidelines promulgated by the Administrator, EPA, under authority of Section 404(b) of the Clean Water Act or the criteria established under authority of Section 102(a) of the Marine Protection Research and Sanctuaries Act of 1972. A permit will be granted unless its issuance is found to be contrary to the public interest.

COMMENTS: The Corps is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other Interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition, or deny a permit for this proposal. To make this determination, comments are used to assess impacts to endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment (EA) and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act (NEPA). Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

The Mobile District will receive written comments on the proposed work, as outlined above, until December 19, 2025. Comments should be submitted electronically via the Regulatory Request System (RRS) at <https://rrs.usace.army.mil/rrs> or to Jessica Savage at sarah.j.savage@usace.army.mil. Alternatively, you may submit comments in writing to the Commander, U.S. Army Corps of Engineers, Mobile District, Attention: Jessica Savage, 100 Canal Street Mobile, Alabama 36601. Copies of all comments should be furnished to the Alabama Department of Environmental Management (ADEM) at coastal@adem.alabama.gov, or sent to: ADEM, Mobile Branch / Coastal Section, 3664 Dauphin Street, Suite B, Mobile, Alabama 36608. Please refer to the permit application number in your comments.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider the application. Requests for public hearings

shall state, with particularity, the reasons for holding a public hearing. Requests for a public hearing will be granted, unless the District Engineer determines that the issues raised are insubstantial or there is otherwise no valid interest to be served by a hearing.
